

LOCKERS & SECURITY SYSTEMS

A black and white photograph of a woman with blonde hair, wearing a light-colored sweatshirt and dark pants, standing in front of a row of lockers. She is reaching up to place a dark backpack onto the top of a locker. The lockers are labeled with numbers and arrows pointing to specific units. To the right of the main image is a vertical strip showing a close-up of a locker's control panel. The panel features a small screen displaying a logo and an information icon, along with several physical buttons and a coin slot.

# INTELLIGENT LOCKERS

# LOCKTEC - YOUR PARTNER FOR SMART LOCKERS

## About Us

LockTec is one of the world's leading manufacturers of electronic locker systems. We have been producing locker solutions for 35 years, for a huge variety of applications. Our locker banks are being used in more than 25 countries.

## Quality

### "Made in Germany"

LockTec is part of a medium-sized, owner-managed group of companies, with over 100 employees, based in Weißenbrunn in Upper Franconia, Germany. Like parent company SITEC, LockTec considers the mark of quality "Made in Germany" to be a top priority.

## Why LockTec?

### ✓ *Everything from one supplier*

We are your partner for everything - from advice, manufacture, and installation to follow-up support!

### ✓ *International Patent-Holder*

As an inventor and patent-holder, we can offer you legal certainty with our products.

### ✓ *Durability*

Our experience in metal-working guarantees durability. Many of our systems have been in operation for over 20 years.

### ✓ *Pioneer for Lockers*

We are developing tomorrow's solutions today, because we recognise trends.

### ✓ *Experience and Know-How*

We have been developing locker systems for 35 years: left luggage storage since 1982, click & collect since 1999, temperature-controlled lockers since 2007.

### ✓ *Open to your Ideas*

We'll find the best solution for any special requirements you have.

## COMPLETE SERVICE

### PROJECT MANAGEMENT

We plan and project manage your locker system, right up to networking.

### PRODUCTION

The locker banks will be manufactured using the latest technology, in accordance with your requirements.

### INSTALLATION

We deliver and install the locker bank and train your employees.

### SERVICE

Even after delivery, we are happy to help.

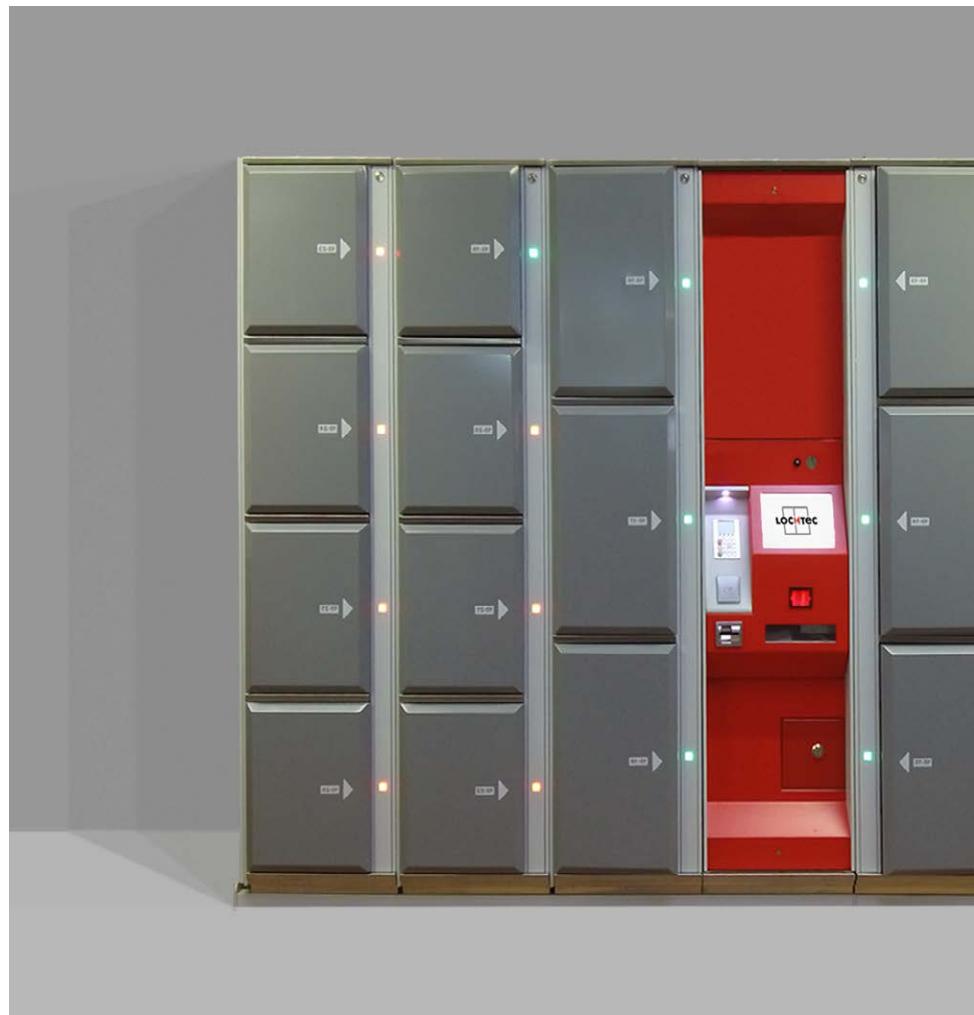

# LEFT LUGGAGE LOCKERS

## LOCKSAFE 5

### Electronic, keyless, left luggage lockers

Locksafe 5 left luggage lockers are designed for public areas. A robust exterior, together with double-skinned doors and multiple locking, ensure a high level of security against vandalism and theft.

One or more locker banks can be networked, even nationally, with a central coordinating server. This allows you to control and monitor the lockers.

### Applications:

AIRPORTS  
STATIONS  
SHOPPING CENTRES  
FERRY TERMINALS  
LEISURE PARKS  
MUSEUMS

# LOCKSAFE

LOCKSAFE PROTECTS YOUR LUGGAGE -  
FOR SURE.

## BENEFITS ...

### ... for the Operator

- ✓ The electronic key (bar code ticket) cannot be copied and if it is lost, the lock doesn't have to be replaced.
- ✓ Hire charges can be modified directly at the locker bank or remotely.
- ✓ The various column types and combinations are designed to suit different luggage sizes.  
Locksafe 5 even offers a locker suitable for bulky golf or skiing equipment.

### ... for the User

- ✓ Secure luggage storage provides freedom to go shopping, sightseeing and eating out.
- ✓ Multilingual menus at the paypoint guarantee easy operation.
- ✓ Hire charges can be paid using coins, notes or cashless payment.
- ✓ Lockers which have integrated sockets can be used to charge electronic devices.

# CLICK & COLLECT SERVICEBOX

## Round the Clock Delivery and Collection

Servicebox is a delivery and collection system, for use in any sector where parcels and goods are handed over.

The locker banks can be used for both B2B and B2C. They will be equipped with the appropriate software to suit the application.

We can also supply systems with multi-carrier functionality.

## Applications:

### ✓ Repair Service

Faulty equipment is delivered to the locker bank. It is returned after repair via the lockers.

### ✓ Parcel Delivery Point in Businesses

Employees can collect their private parcels at the system.

### ✓ Service Point

Various service providers can deliver their goods via the locker bank.

### ✓ Parcel Point

The parcel service provider delivers parcels directly to the locker bank. The customer can then collect them from there.

### ✓ E-Concierge

Can be used for parcels and services in blocks of flats and apartments.

# SERVICEBOX

ALWAYS AT YOUR SERVICE.

## BENEFITS ...

### ... for the Operator

- ✓ Delivery cost reductions – no more second and third deliveries required.
- ✓ Competitive advantage over competitors, by taking a different approach.
- ✓ Procedures can be customised with your company processes and linked with your ERP and Web shop software.

### ... for the User

- ✓ 24/7: delivery and collection of parcels and goods round the clock.
- ✓ No waiting time when collecting items.
- ✓ Notification by email when ready to collect.
- ✓ No more missed deliveries.

# CHILLED LOCKERS

## COOL LOCKERS

### Chilled delivery lockers for foodstuffs

Cool lockers are temperature-controlled delivery lockers.

Foodstuffs, goods and sensitive electronic devices can be delivered to the customer using the locker bank. In addition to chilled and frozen modules, the system can also be equipped with heated lockers.

The locker banks can be used for both B2B and B2C applications.

Multi-carrier functionality can also be implemented in these locker systems.

### Applications:

SUPERMARKETS

BUTCHERS' SHOPS

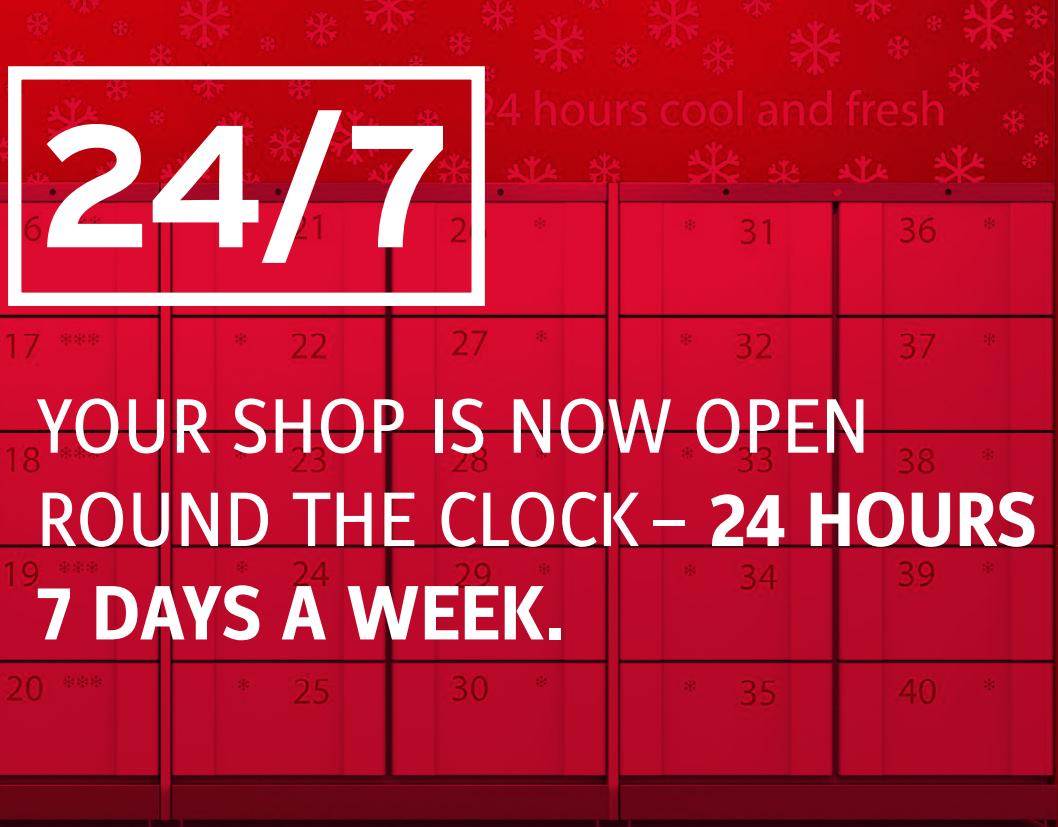

SHOPPING CENTRES

CATERING SERVICE PROVIDERS

PHARMACIES

INDUSTRY

## BENEFITS ...

### ... for the Operator

- ✓ Your customers can now collect their purchases 24 hours a day.
- ✓ You are offering your customers more flexibility and improved service when shopping (long term customer relations).
- ✓ A delivery locker bank increases your turnover and takes the pressure off your employees.

### ... for the User

- ✓ 24/7: order and collect foodstuffs & goods round the clock.
- ✓ Purchasing online & collecting at the locker bank saves time spent purchasing in a shop.
- ✓ Just-in-time collection: you can collect the food items just when you really need them.

# INTELLIGENT LOGISTICS LOCKSAFE CONTROL

## Lockers for logistics processes

For employee collection and handover of tools and control units, such as scanners, measuring devices or handheld units. The software provides administration, control and analysis of locker usage and contents.

The various roles and rights schemes provide numerous different ways to use the system.

The lockers can be opened using PIN, QR code, RFID card or fingerprint. In addition, the lockers can be equipped with sockets for charging mobile devices.

## Applications:

RAILWAY COMPANIES  
LOGISTICS COMPANIES  
PHARMACIES  
TOOL MANAGEMENT  
REPAIR SERVICES  
CARRIERS

# OTHER LOCKER SOLUTIONS

## Velosafe

Also suitable for short-term, spontaneous storage of bikes. The user selects an empty locker and puts their bike in. They pay the hire charge at the pay station and receive a bar code ticket. The user is not obliged to have a long-term hire contract, as was the case with earlier systems. In addition, the lockers can be equipped with sockets for charging e-bikes.

## Locksafe Depot

For storage and handover of valuables. Locksafe Depot is attack-resistant and tested to resistance class RC3. We can supply either an electronic version or a mechanical version with keys.

## Security and Quality

### Do you have special requirements for your locker bank?

We can develop and manufacture the lockers to your specifications.

## Software

### Do you need special software for your lockers?

Our software developers will provide the necessary interfaces, or can provide complete solutions for you.

## LockTec supplies intelligent lockers for:

- stations
- airports
- delivery & parcel services
- pharmacies
- court facilities
- supermarkets
- shopping centres
- repair services
- butchers' shops
- industry
